SUBJECT INDEX

Canadian Journal of Animal Science, Volume 65, 1985

Absorption
  adrenal influence on IgG absorbtion by piglets, 77
  influence of temperature on IgG absorption by piglets, 87
Acidosis
  choline in concentrate diets of feedlot steers, 135
Age
  pregnancy rate of heifers, 595
Alfalfa
  chlorophyll in rumen fluid and bloat, 147
  maturity affects alfalfa silages, 659
  ruminal digestion of alfalfa, 157
Alkaline phosphatase
  Ca, P and vitamin D_3 for lambs, 163
Alkaloids
  ergot from different sources, 953
  treatment effects on ergot toxicity, 975
Allometric growth coefficients
  growth and feeding characteristics, 929
Alternating light for roaster chickens, 993
Amino acid
  amino acid formulation, 205
  amino acid supplementation and broiler carcass composition, 717
  utilisation of amino acids in canola meal, 197
Ammoniation
  ammoniated mustard meal, 937
  ammonia-treated high-moisture ear corn for steers, 411
Anabolic compounds
  hydroxyproline excretion in growing steers, 515
Androgens
  androgens, LH and FSH in bull calves, 95
Animal Science
  biotechnology in animal science, 525
Antitox vana
  treatment effects on ergot toxicity, 975
Artificial rearing
  parameters of early growth traits in lambs, 37
  warm vs. cold milk replacer for lambs, 871
Automated feeder
  automated feeder for sheep, 273
Ayrshire
  growth and carcass traits of dairy steers, 507

Bacteria
  gene manipulation in rumen microbes, 563
Bacterial yield
  digestion as influenced by level of feed intake, 437
Barley (hulless)
  hulless barley in chick disease, 725
Beef bull
  carcass composition of double muscled cattle, 279
  growth rate, scrotal circumference, 789
  response of Angus, Charolais, and Hereford bulls to black flies, 279
Beef cattle
  bone development of double muscled cattle, 319
  breed effects on preweaning traits of calves, 583
  bull fertility in single-sire mating, 799
  carcass quality of three-way cross beef cattle, 51
  choline in concentrate diets of feedlot steers, 135
  fat growth and partitioning in cattle, 295
  growth promotants for finishing cattle, 705
  influence of time of PGF on ovulation, 405
  muscle development in double muscled cattle, 307
  NaCl and limestone in beef steers, 673
  pregnancy rate of heifers, 595
  reproductive performance in heifers exposed to bulls, 31
  selection response in beef cattle, 1
Behavior
  periparturient behaviour in swine, 777
β-glucan
  hulless barley in chick disease, 725
Biological type
  carcass tissue yield and distribution in cattle, 363
  muscle, bone and fat accretion in feedlot bulls, 351
Biotechnology
  biotechnology in animal science, 525
  gene transfer in animals, 539
Black fly
  response of Angus, Charolais, and Hereford bulls to black flies, 269
Bloat
  chlorophyll in rumen fluid and bloat, 147
  ruminal digestion of alfalfa, 157

Boar
androstenone depletion following castration, 247
nutrition influences on boar bone, 483
pork carcass grading, 619
toe size and lesions of boars as influenced by nutrition, 459
Body weight
pregnancy rate of heifers, 595
reproductive performance in heifers exposed to bulls, 31
Bone
bone development of double muscled cattle, 319
nutrition influences on boar bone, 483
zeranol and bone growth in cull cows, 511
zeranol and bone growth in steers and bulls, 835
Bone minerals
dietary soapstock and mineral metabolism, 945
nutrition influences on boar bone, 483
Bovine malate dehydrogenase, 383
Breed
carcass quality of three-way cross beef cattle, 51
pork carcass grading, 619
Breed differences
growth and feeding characteristics, 929
Breed effects
breed effects on preweaning traits of calves, 583
Breed type
carcass composition of double muscled cattle, 279
fat growth and partitioning in cattle, 295
Brown swiss cross
the Canadian breed of cattle, 11
Brown-egg layers
TMA oxidase activity and TMA in blood plasma and eggs, 921
Buffer
cement kiln dust fed steers, 429
sodium bicarbonate in dairy rations, 521
Bull
androgens, LH and FSH in bull calves, 95
bull fertility in single-sire mating, 799
muscle development in double muscled cattle, 307
reproductive performance in heifers exposed to bulls, 31

Calcium
Ca, P and vitamin D_3 for lambs, 163
dietary soapstock and mineral metabolism, 945
relationship of nutrients in forages, 251
Calf
androgens, LH and FSH in bull calves, 95
weaning ages for dairy calves, 445
whey-canola meal mixture for calves, 683
Cannulation
cannulation and temperature on sow's serum cortisol, 399
porcine pancreatic secretions, 451
Canola
canola vs. soya for layers, 905
mineral profile of canola and soybean meal, 913
sodium and potassium in canola and soya, 211
utilisation of amino acids in canola meal, 197
vitamins and canola and soybean, 217
whey-canola meal mixture for calves, 683
Carcass
carcass quality of three-way cross beef cattle, 51
diet and sex effects on pig performance, 185
factors affecting pig growth and carcass, 821
growth and carcass traits of dairy steers, 507
growth and carcass traits of Finnsheep crosses, 811
low voltage stimulation of cow carcasses, 603
zeranol and bone growth in cull cows
zeranol and bone growth in steers and bulls, 835
Carcass composition
carcass composition of double muscled cattle, 279
carcass composition of selected mice, 239
carcass tissue yield and distribution in cattle, 363
prediction of carcass composition, 243
Carcass fat color
grass and corn silage finishing, 769
Carcass grade
carcass tissue yield and distribution in cattle, 363
grass and corn silage finishing, 769
prediction of carcass composition, 243
Carcass measurements
prediction of carcass composition, 243
Carcass quality
fasting and carcass shrink, 613
Carotid artery
carotid artery exteriorization in goats, 761
Castration
Androstenone depletion following castration, 247

Zeranol and bone growth in steers and bulls, 835
Cattle
Canadian breed of cattle, 11
carcass tissue yield and distribution in cattle, 363
chlorophyll in rumen fluid and bloat, 147
degradation of nitrate and nitrite in cattle, 647
diet and microbial protein synthesis, 101
fat growth and partitioning in cattle, 295
forage Zn, Mn and Fe—northwestern Manitoba, 861
growth promotants for finishing cattle, 705
supplementation of grass silage, 897
zeranol and bone growth in cull cows, 511
zeranol and bone growth in steers and bulls, 835
Cement kiln dust
lambs fed cement kiln dust, 419
steers fed cement kiln dust, 429
Chemical analysis
forage analysis by near infrared reflectance, 753
Chewing behavior
forage intake, chewing and digesta particles, 69
Chicken
alternating lights for roaster chickens, 993
amino acid supplementation and broiler carcass composition, 717
canola vs. soya for layers, 905
dietary ergot and chick performance, 963
dietary salt levels for broiler chickens, 773
ergot from different sources, 953
genetic engineering and poultry disease, 553
hulless barley in chick disease, 725
mineral profile of canola and soybean meals, 913
photoperiod and diets for dwarf meat breeders, 113
salinomycin aid lincomycin in coccidia-infected broilers, 255
treatment effects on ergot toxicity, 975
vitamins and canola and soybean, 217
Chlorophyll
in rumen fluid and bloat, 147
ruminal digestion of alfalfa, 157
Chlortetracycline
growth promotants for finishing cattle, 705
Choline, in concentrate diets of feedlot steers, 135
Cloaca
ejection of frothy fluid in rooster, 985
Coccidiosis
salinomycin and lincomycin in coccidia-infected broilers, 255
Cold stress
forage intake, chewing and digesta particles, 69
Collagen metabolism
hydroxyproline excretion in growing steers, 515
Colostrum
adrenal influence on IgG absorbtion by piglets, 77
influence of temperature on IgG absorption by piglets, 87
Cortisol
cannulation and temperature on sow's serum cortisol, 399
influence of temperature on IgG absorption by piglets, 87
Crossbreds
growth and carcass traits of dairy steers, 507
Cull cow
zeranol and bone growth in cull cows, 511

Dairy cattle
digestion as influenced by level of feed intake, 437
three methods to extend records in progress, 341
wet corn gluten feed for dairy cows, 125
Dairy steer
growth and carcass traits of dairy steers, 507
Degradation
degradation of nitrate and nitrite in cattle, 647
Deuterium oxide
estimation of piglet milk intake, 989
Diet
carcass tissue yield and distribution in cattle, 363
dietary salt levels for broiler chickens, 773
factors affecting pig growth and carcass, 821
muscle, bone and fat accretion in feedlot bulls, 351
photoperiod and diets for dwarf meat breeders, 113
Dietary supplements
dietary sodium bicarbonate for horses, 745
Digesta particle size
forage intake, chewing and digesta particles, 69
Digesta pH
lambs fed cement kiln dust, 419
Digestibility
digestibility and intake of forages, 879

frost-damaged canola for pigs, 735
maturity affects alfalfa silages, 659
rapeseed and soybean hulls in starter pig diets, 231
weaning ages for dairy calves, 445
Digestion
diet and microbial protein synthesis, 101
Digestion kinetics
alfalfa on roughage digestion, 693
DLS (Dorset-Leicester-Suffolk) sheep
growth and carcass traits of finnsheep crosses, 811
Double muscling
bone development of double muscled cattle, 319
carcass composition of double muscled cattle, 279
fat growth and partitioning in cattle, 295
muscle development in double muscled cattle, 307
Dry matter disappearance
soluble nutrients and in situ measures, 667
Dwarfs
photoperiod and diets for dwarf meat breeders, 113

Egg composition
canola vs. soya for layers, 905
Embryo manipulation
biotechnology in animal science, 525
embryo manipulation and gene transfer in livestock, 527
Endogenous virus
genetic engineering and poultry disease, 553
Energy intake
nutrition influences on boar bone, 483
toe size and lesions of boars as influenced by nutrition, 459
Enzyme supplementation
hulless barley in chick disease, 725
Ergot
dietary ergot and chick performance, 963
ergot from different sources, 953
treatment effects on ergot toxicity, 975
Escherichia coli
gene manipulation in rumen microbes, 563
Estrous cycle
ovarian activity of lactating cows, 391
Exercise
exercise and reproductive performance of sows, 851
Extension factors
three methods to extend records in progress, 341

Farrowing
exercise and reproductive performance of sows, 851
Fasting
fasting and carcass shrink, 613
Fat
carcass composition of selected mice, 239
carcass fat color, 769
Fat deposition, and fatty acid composition in the neonatal pig, 175
Fat growth, and partitioning in cattle, 295
Fat production
the Canadian breed of cattle, 11
Fatty acid biosynthesis
fat deposition and fatty acid composition in the neonatal pig, 175
Feed consumption
dietary ergot and chick performance, 963
Feed efficiency
growth and feeding characteristics, 929
Feed intake
ammonia-treated high-moisture ear corn for steers, 411
diet and sex effects on pig performance, 185
digestion as influenced by level of feed intake, 437
Feeding (controlled)
automated feeder for sheep, 273
Feeding trial
ammoniated mustard meal, 937
Feeding value
frost-damaged canola for pigs, 735
Feedlot
lasalocid in liquid supplements, 891
Feedlot bull
muscle, bone and fat accretion in feedlot bulls, 351
Feedlot performance
zeranol and bone growth in cull cows, 511
Fescue (tall)
ruminal herbage nitrogen and sulfur disappearance, 631
Fiber
rapeseed and soybean hulls in starter pig diets, 231
Fiber passage
alfalfa on roughage digestion, 693
Finnsheep crosses
growth and carcass traits of Finnsheep crosses, 811
Fishmeal
supplementation of grass silage, 897
5α-androstenone depletion
androstenone depletion following castration 247

Fluid passage
forage intake, chewing and digesta particles, 69
Forage
forage analysis by near infrared reflectance, 753
forage Zn, Mn and Fe—northwestern Manitoba, 861
growth promotants for finishing cattle, 705
relationship of nutrients in forages, 251
Forage digestibility
digestibility and intake of forages, 879
Forage intake
forage intake, chewing and digesta particles, 69
Forestomach
digestion as influenced by level of feed intake, 437
Formic acid
maturity affects alfalfa silages, 659
Frost damage
frost-damaged canola for pigs, 735
Frothy fluid
ejection of frothy fluid in rooster, 985

Gamma irradiation
hulless barley in chick disease, 725
Gene manipulation in rumen microbes, 563
Gene transfer
embryo manipulation and gene transfer in livestock, 527
gene transfer in animals, 539
Genetic and phenotypic correlations
parameters of early growth traits in lambs, 37
Genetic correlations
genetic and phenotypic parameters in suffolk lambs, 575
Genetic engineering
biotechnology in animal science, 525
embryo manipulation and gene transfer in livestock, 527
Genotypic selection index
sensitivity of a selection index to parameter changes, 21
Germ line
genetic engineering and poultry disease, 553
Gestation housing and reproduction in sows, 221
Gilt
dietary selenium during gestation and lactation of gilts, 497
pork carcass grading, 619
Glucosindolate
tma oxidase activity and TMA in blood plasma and eggs, 921
Goat
carotid artery exteriorization in goats, 761
Gonadotropins
androgens, LH and FSH in bull calves, 95
Grass
relationship of nutrients in forages, 251
Grass silage
supplementation of grass silage, 897
Growing-finishing pigs
salinomycin for barrows and gilts, 259
Growth
diet and sex effects on pig performance, 185
dietary ergot and chick performance, 963
factors affecting pig growth and carcass, 821
grass and corn silage finishing, 769
growth and carcass traits of finnsheep crosses, 811
NaCl and limestone in beef steers, 673
supplementation of grass silage, 897
Growth patterns
carcass composition of double muscled cattle, 279
Growth performance
rapeseed and soybean hulls in starter pig diets, 231
Growth rate
growth rate, scrotal circumference, 789
lambs fed cement kiln dust, 419
salinomycin for barrows and gilts, 259
Growth traits
selection response in beef cattle, 1

Hay
digestibility and intake of forages, 879
Heart
bovine MDH, 383
Heifer reproduction
pregnancy rate of heifers, 595
reproductive performance in heifers exposed to bulls, 31
Hematology
dietary sodium bicarbonate for horses, 745
Heritability
genetic and phenotypic parameters in Suffolk lambs, 575
parameters of early growth traits in lambs, 37
Heterosis
growth and feeding characteristics, 929
High-moisture ear corn
ammonia-treated high-moisture ear corn for steers, 411
Holstein
growth and carcass traits of dairy steers, 507

Horse
dietary sodium bicarbonate for horses, 745
metabolic response of horses to temperature stress, 375
Hulls
rapeseed and soybean hulls in starter pig diets, 231
Hydroxyproline
hydroxyproline excretion in growing steers, 515

Immunoglobulin G
adrenal influence on IgG absorbtion by piglets, 77
influence of temperature on IgG absorption by piglets, 87
Implants
growth promotants for finishing cattle, 705
Index selection effectiveness
sensitivity of a selection index to parameter changes, 21
Iron
forage Zn, Mn and Fe—northwestern Manitoba, 861
Isoleucine
ammoniated mustard meal, 937

Lactation
dietary selenium during gestation and lactation of gilts, 497
sodium bicarbonate in dairy rations, 521
wet corn gluten feed for dairy cows, 125
Lactic acid
choline in concentrate diets of feedlot steers, 135
Lamb
Ca, P and vitamin D_3 for lambs, 163
genetic and phenotypic parameters in suffolk lambs, 575
lambs fed cement kiln dust, 419
parameters of early growth traits in lambs, 37
warm vs. cold milk replacer for lambs, 871
Lasalocid
lasalocid in liquid supplements, 891
Laying hen
canola vs. soya for layers, 905
Lead
cement kiln dust fed steers, 429
Leghorn
dietary ergot and chick performance, 963
Legumes
relationship of nutrients in forages, 251
ruminal digestion of alfalfa, 157
Lifetime performance
male effect on lifetime performance in mice, 333
Light
alternating lights for roaster chickens, 993
Limestone
NaCl and limestone in beef steers, 673
Lincomycin
salinomycin and lincomycin in coccidia-infected broilers, 255
Liquid supplement
lasalocid in liquid supplements, 891
Litter origin
factors affecting pig growth and carcass, 821
Litter size
gestation housing and reproduction in sows, 221
Livestock production
gene transfer in animals, 539
Low voltage electrical stimulation of cow carcasses, 603
Luteinizing hormone influence of time of PGF on ovulation, 405
Lymphoid leukosis
genetic engineering and poultry disease, 553
Lysine
ammoniated mustard meal, 937

Magnesium oxide
sodium bicarbonate in dairy rations, 521
Malate dehydrogenase
bovine MDH, 383
Manganese
dietary manganese and trace minerals in sheep tissues, 653
forage Zn, Mn and Fe—northwestern Manitoba, 861
Maturity stage
maturity affects alfalfa silages, 659
Meat breeders
photoperiod and diets for dwarf meat breeders, 113
Meat meal
soluble nutrients and in situ measures, 667
Meat yields
amino acid supplementation and broiler carcass composition, 717
pork carcass grading, 619
Metabolic rate
metabolic response of horses to temperature stress, 375
Microbial protein
diet and microbial protein synthesis, 101
Milk fat depression
sodium bicarbonate in dairy rations, 521

Milk intake
estimation of piglet milk intake, 989
Milk production
estimation of piglet milk intake, 989
the Canadian breed of cattle, 11
Milk replacer (warm vs. cold), for lambs, 871
Minerals
dietary manganese and trace minerals in sheep tissues, 653
dietary soapstock and mineral metabolism, 945
forage Zn, Mn and Fe—northwestern Manitoba, 861
mineral profile of canola and soybean meal, 913
nutrition influences of boar toe horn-wall, 473
nutrition influences on boar bone, 483
toe size and lesions of boars as influenced by nutrition, 459
Monensin
growth promotants for finishing cattle, 705
Monozygotic twins
embryo manipulation and gene transfer in livestock, 527
Mouse
carcass composition of selected mice, 239
male effect on lifetime performance in mice, 333
Muscle distribution
muscle development in double muscled cattle, 307
Muscle growth
muscle development in double muscled cattle, 307
Mustard meal
ammoniated mustard meal, 937

Near infrared reflectance spectroscopy
forage analysis by near infrared reflectance, 753
Nitrate/nitrite
degradation of nitrate and nitrite in cattle, 647
nitrate acclimation in sheep, 841
Nitrogen
ruminal herbage nitrogen and sulfur disappearance, 631
Nitrogen balance
utilisation of amino acids in canola meal, 197
Nitrogen disappearance
soluble nutrients and in situ measures, 667
Nitropropanol
degradation of nitrate and nitrite in cattle, 647
Nursing
periparturient behavior in swine, 777
Nutrition
nutrition influences of boar toe horn-wall, 473
Nutritive value
digestibility and intake of forages, 879
Nylon bag
ruminal digestion of alfalfa, 157

Odor
androstenone depletion following castration, 247
Orchardgrass
ruminal herbage nitrogen and sulfur disappearance, 631
Ovarian activity of lactating cows, 391
Ovulation
influence of time of PGF on ovulation, 405
Oxazolidinethione
TMA oxidase activity and TMA in blood plasma and eggs, 921

Pancreas
porcine pancreatic secretions, 451
Pancreatic glucagon radioimmunoassay for glucagon, 765
Parturition
periparturient behavior in swine, 777
Peak progesterone
ovarian activity of lactating cows, 391
pH
lambs fed cement kiln dust, 419
ruminal digestion of alfalfa, 157
Phenotypic selection index
sensitivity of a selection index to parameter changes, 21
Phosmet
response of Angus, Charolais, and Hereford bulls to black flies, 269
Phosphorus
Ca, P and vitamin D_3 for lambs, 163
relationship of nutrients in forages, 251
Photoperiod and diets for dwarf meat breeders, 113
Piglet
adrenal influence on IgG absorbtion by piglets, 77
dietary selenium during gestation and lactation of gilts, 497
estimation of piglet milk intake, 989
influence of temperature on IgG absorption by piglets, 87
testosterone, sex and teat-seeking ability of piglets, 627
Pig
diet and sex effects on pig performance, 185

factors affecting pig growth and carcass, 821
fat deposition and fatty acid composition in the neonatal pig, 175
frost-damaged canola for pigs, 735
salinomycin for barrows and gilts, 259
utilization of amino acids in canola meal, 197
Pork carcass grading, 619
Postweaning
dietary selenium during gestation and lactation of gilts, 497
Potassium
sodium and potassium in canola and soya, 211
Pregnancy
dietary selenium during gestation and lactation of gilts, 497
Preservatives
wet corn gluten feed, 265
Preweaning traits
breed effects on preweaning traits of calves, 583
Principal component analysis
pregnancy rate of heifers, 595
Processed yield
fasting and carcass shrink, 613
Prostaglandin
influence of time of PGF on ovulation, 405
Protein
chlorophyll in rumen fluid and bloat, 147
relationship of nutrients in forages, 251
Protein solubility
wet corn gluten feed for dairy cows, 125
Proteolysis
ammonia-treated high-moisture ear corn for steers, 411
Puberty
androgens, LH and FSH in bull calves, 95
Pullet growth
amino acid formulation, 205

Rapeseed
frost-damaged canola for pigs, 735
rapeseed and soybean hulls in starter pig diets, 231
Rapeseed meal
TMA oxidase activity and TMA in blood plasma and eggs, 921
Rate of passage
diet and microbial protein synthesis, 101
Ration adjustment period
lasalocid in liquid supplements, 891
Reciprocal differences
growth and feeding characteristics, 929
Recovery
treatment effects on ergot toxicity, 975
Reproduction
male effect on lifetime performance in mice, 333
the Canadian breed of cattle, 11
Reproductive performance
exercise and reproductive performance of sows, 851
Retrovirus
genetic engineering and poultry disease, 553
Roaster chicken
alternating lights for roaster chickens, 993
Rooster
ejection of frothy fluid in rooster, 985
Roughage
alfalfa on roughage digestion, 693
Rumen
chlorophyll in rumen fluid and bloat, 147
choline in concentrate diets of feedlot steers, 135
gene manipulation in rumen microbes, 563
Rumen bacteria
nitrate acclimation in sheep, 841
Rumen digestion as influenced by level of feed intake, 437
Rumen epithelium
bovine MDH, 383
Rumen fermentation
nitrate acclimation in sheep, 841
Rumen forage
diet and microbial protein synthesis, 101
Rumen microflora
biotechnology in animal science, 525
Rumen parameters
alfalfa on roughage digestion, 693
Ruminal in situ disappearance
ruminal herbage nitrogen and sulfur disappearance, 631

Salinomycin
and lincomycin in coccidia-infected broilers, 255
for barrows and gilts, 259
Salt
dietary salt levels for broiler chickens, 773
Scrotal circumference
growth rate, scrotal circumference, 789
Selection
carcass composition of selected mice, 239
Selection index
sensitivity of a selection index to parameter changes, 21
Selection response in beef cattle, 1

Selenium
dietary selenium during gestation and lactation of gilts, 497
Semen characteristics
growth rate, scrotal circumference, 789
Sensory odor
androstenone depletion following castration, 247
Serum amino acids
ammoniated mustard meal, 937
Serum minerals
dietary soapstock and mineral metabolism, 945
Serum testosterone
testosterone, sex and teat-seeking ability of piglets, 627
Sex
testosterone, sex and teat-seeking ability of piglets, 627
Sex effects
diet and sex effects on pig performance, 185
Sex-type
factors affecting pig growth and carcass, 821
Sexual development
zeranol and bone growth in steers and bulls, 835
Sheep
alfalfa on roughage digestion, 693
automated feeder for sheep, 273
dietary manganese and trace minerals in sheep tissues, 653
nitrate acclimation in sheep, 841
parameters of early growth traits in lambs, 37
radioimmunoassay for glucagon, 765
Silage
digestibility and intake of forages, 879
maturity effects alfalfa silages, 659
Silage finishing
grass and corn silage finishing, 769
Single-sire mating
bull fertility in single-sire mating, 799
Soapstock
dietary soapstock and mineral metabolism, 945
Sodium and potassium in canola and soya, 211
Sodium bicarbonate
dietary sodium bicarbonate for horses, 745
in dairy rations, 521
Sodium chloride
dietary salt levels for broiler chickens, 773
NaCl and limestone in beef steers, 673
Soundness
toe size and lesions of boars as influenced by nutrition, 459
Sow
cannulation and temperature on sow's serum cortisol, 399
estimation of piglet milk intake, 989
exercise and reproductive performance of sows, 851
gestation housing and reproduction in sows, 221
testosterone, sex and teat-seeking ability of piglets, 627
Soybean meal
mineral profile of canola and soybean meal, 913
soluble nutrients and in situ measures, 667
vitamins and canola and soyabean, 217
Specific gravity
prediction of carcass composition, 243
Stability
lasalocid in liquid supplements, 891
Starter pig
utilisation of amino acids in canola meal, 197
Starter rations
whey-canola meal mixture for calves, 683
Steer
ammonia-treated high-moisture ear corn for steers, 411
cement kiln dust fed steers, 429
choline in concentrate diets of feedlot steers, 135
digestibility and intake of forages, 879
grass and corn silage finishing, 769
hydroxyproline excretion in growing steers, 515
Steriods
exercise and reproductive performance of sows, 851
Stress
forage intake, chewing and digesta particles, 69
cannulation and temperature on sow's serum cortisol, 399
Sudden death syndrome
alternating lights for roaster chickens, 993
Suffolk
genetic and phenotypic parameters in Suffolk lambs, 575
Sulfur
ruminal herbage nitrogen and sulfur disappearance, 631
Supplementation
alfalfa on roughage digestion, 693
Surgery
carotid artery exteriorization in goats, 761

Swine
growth and feeding characteristics, 929
nutrition influences of boar toe horn-wall, 473
periparturient behaviour in swine, 777
porcine pancreatic secretions, 451
rapeseed and soybean hulls in starter pig diets, 231

Teat-seeking ability
testosterone, sex and teat-seeking ability of piglets, 627
Temperature
cannulation and temperature on sow's serum cortisol, 399
metabolic response of horses to temperature stress, 375
Thyroid hormones
metabolic response of horses to temperature stress, 375
Thyroid size
TMA oxidase activity and TMA in blood plasma and eggs, 921
Tissue growth
muscle, bone and fat accretion in feedlot bulls, 351
Tissue minerals
dietary manganese and trace minerals in sheep tissues, 653
TMA (trimethylamine) oxidase activity and TMA in blood plasma and eggs, 921
Toe horn-wall composition
nutrition influences of boar toe horn-wall, 473
Toe lesions
toe size and lesions of boars as influenced by nutrition, 459
Toxic components
ergot from different sources, 953
Toxicosis
response of Angus, Charolais, and Hereford bulls to black flies, 269
Trace minerals
dietary manganese and trace minerals in sheep tissues, 653
Transgenic livestock
embryo manipulation and gene transfer in livestock, 527
Treatments
treatment effects on ergot toxicity, 975

Vectors
genetic engineering and poultry disease, 553
Vitamins
Ca, P and vitamin D_3 for lambs, 163
nutrition influences on boar bone, 483
toe size and lesions of boars as influenced by nutrition, 459
vitamins and canola and soyabean, 217
Volatile fatty acids
weaning ages for dairy calves, 445

Weaner pigs
dietary soapstock and mineral metabolism, 945
Weaning
weaning ages for dairy calves, 445
Weigh-suckle-weigh
estimation of piglet milk intake, 989
Weight gain
response of Angus, Charolais, and Hereford bulls to black flies, 269
Wet corn gluten feed, 125, 265
Whey
whey-canola meal mixture for calves, 683
Wilted silage
maturity affects alfalfa silages, 659

Zeranol
and bone growth in cull cows, 511
and bone growth in steers and bulls, 835
Zinc
forage Zn, Mn and Fe—northwestern Manitoba, 861
